Hiring Manager
Charles & Keith Group

Job Reference: UI/UX Developer

Dear Hiring Manager,

I am writing to express my enthusiasm for the UI/UX Developer position at Charles & Keith Group. As a developer with a deep passion for Front-End UI/UX design, I have long admired Charles & Keith's digital presence. I am eager to contribute my technical skills to enhance the performance and aesthetic of your ecommerce platforms.

In my previous work, I have focused heavily on the intersection of design and development. I understand that for a fashion lifestyle brand, the user interface is not just about functionality-it is about the feeling it evokes. My experience includes writing reusable, efficient code to implement responsive designs that ensure a seamless visual experience across various browsers and devices.

Regarding the specific requirements for this role, I am confident in my ability to execute the following:

- Design & Implementation: I thrive in translating static designs into interactive, high-performance web pages, paying close attention to pixel-perfect UI and intuitive UX.
- Technical Integration: I am experienced in collaborating with backend developers to ensure smooth integration between frontend interfaces and backend systems.
- Cross-Functional Collaboration: I value clear communication and have successfully worked alongside designers and project managers to bring creative concepts to life while adhering to technical constraints.

I am particularly excited about the opportunity to support the development of marking content and maintain the high standard of the Charles & Keith ecommerce experience. I look forward to the possibility of discussing how my front-end expertise can support your team's goals.

Thank you for your time and consideration.

Warm regards,

Tan Yu En, Charlisa

TAN YU EN, CHARLISA

Fresh Graduate in Information Technology from Nanyang Polytechnic

👤 Profile

A dedicated Information Technology fresh graduate from Nanyang Polytechnic, equipped with a strong foundation in project management and teamwork. Proficient in HTML5, CSS, and Power BI, with a specialized focus on UI/UX design. Passionate about building intuitive, user-friendly digital experiences and translating data into visual insights.
